

## A vital Tool Kit for Fast, Safe & Accurate Mounting of Bearings

### **ANTIMU BEARING FITTING TOOL KIT MODEL AM 100 MARK IV**

#### **TECHNICAL DATA: AM 100 MARK IV**

This New Generation Bearing Fitting Tool Kit manufactured by Antimu consists of 3 Aluminium Alloy sleeves and 36 impact rings. The sleeve impact surfaces and rings are made of Super tough, light weight, impact resistant, ultra high molecular weight (UHMW-Pe) polyethylene material. Diverse combinations of impact sleeves with impact rings allows one to mount more than 200 types & sizes of Bearings and other components between a bore diameter of 10 mm to 55mm with precision & accuracy. Each sleeve can accommodate 200 mm (8") projecting shaft length. The kit comes in a special case. The mass including, case weighs about 8 kgs. inclusive of a special mallet.

#### **ADVANTAGES**

- 1) Extremely light kit makes it very portable and convenient to handle.
- 2) Ensures ready availability of components for mounting the Bearings when required.
- 3) Even distribution of mounting force ensures accurate alignment and damage free mounting.
- 4) No chance of dust or dirt being injected in the Bearing.
